SUMMARY

Software Engineer with 3+ years of experience building scalable, reliable, and performant applications. Skilled in debugging complex issues, spotting bottlenecks and designing solutions, optimizing system behavior, and delivering maintainable software, with hands-on experience with cloud-native architectures, container orchestration, and distributed systems. Active open-source contributor and maintainer. Dedicated to continuous learning.

EXPERIENCE

Software Engineer *Part Financial Data Processing Co*

April 2025 - Present

- Reduced batch processing time by **40%** in **Go** through utilizing **concurrency patterns**
- Optimized **PostgreSQL** search queries by **20x** by adding **TimescaleDB** to tech stack
- Improved performance of **Go service** by **3x** using **hypopg**, indexing in **PostgreSQL**
- Migrated a data-processing system to an **EDA** using **NATS**, reducing I/O bottlenecks
- Refactored **4** services to support **K8s** deployment by applying **cloud-native** practices
- Built **DevOps** stack with **K8s** cluster, IaC, **CI/CD** pipelines, and managed **10+** servers

Golang Developer *Artizens*

August 2023 - June 2024

- Developed **10+** services using **Go**, **PostgreSQL**, **Redis** and microservice architecture
- Maintained **90% test coverage** across services by adding cases and refining test suites
- Gained hands-on experience with **NATS**, **Kafka**, and **RabbitMQ** in **3** applications
- Crafted WAF system using Nginx/NAXI and **Go** to hide **80%** of config complexities
- Implemented KYC system with Python to automate **100%** of multi-stage validation

C Developer *ZharfPooyan Toos*

July 2021 - June 2023

- Engineered **4** PAM modules using **C** for designing the AAA feature of the L3 switch
- Designed a **networking performance lab** to measure RFC2544 for **10+** appliances
- Developed a Unix-compatible DHCP server using **C**, CMake and virtual monorepo
- Ported **DPDK** for packet journey, enabling processing of **1,000,000+** packets/sec
- Contributed to command line features of network router using **C** and FRRouting

OPEN-SOURCE

- Enhanced code quality of the **Go standard library** with 4 successful code reviews
- Contributed to **10 open-source projects** such as **PTerm**, **GORM**, **linuxdoc-tools**, etc
- Crafted a **distributed NoSQL DB** and its **Operator** using **Go**, **gRPC** and **Operator-SDK**
- Maintained **60+** personal hobby open-source projects using diverse technologies
- Led and revived Mashhad LUG after **3** years, organizing **10+** sessions in **6** months

EDUCATION

Bachelor of Computer Engineering

Azad University of Mashhad

Aug, 2022 - Present

SKILLS

Go, C, Python, Bash, Unix, Echo, GORM, Redis, Docker, Docker Compose, Git, Git-Lab CI/CD, Nginx/NAXI, NATS.io, Kafka, RabbitMQ, Prometheus, Grafana, Postman, Swagger, $\text{\LaTeX}$, Networking, Kubernetes, Ansible, Terraform, CNPG, Operator-SDK, Ingress, PostgreSQL, DevOps, gRPC, CISCO, AAA, DPDK, FRR, TRex, PAM, Scrum
